

Young Researchers Algebra Conference 2025

September 3-5, 2025 - Florence (Italy)

This is the **fourth** edition of the conference. The goal is to bring together young algebraists and to give them the opportunity to present their latest research. Particular focuses of the conference are Group Theory, Representation Theory, Profinite Groups, Ring Theory, and algebraic structures related to the Yang Baxter Equation, but all topics within algebra are very welcome.
